

Multi-level support for local authorities to improve energy efficiency

Conference

26 September 2018, 09:30-14:00

venue: Kossuth klub - Muzikum (Budapest, VIII. Múzeum u. 7.)

Outline

Local authorities and policy makers, as local consumers and producers ('prosumers') of energy, are in the position to lead the local sustainable energy transition. Energy efficiency (EE) is a cornerstone of sustainable energy policies as EPBD and relevant national regulation on nZEB requirements demonstrate.

This session will aim at mapping of local authorities' possibilities to deal with EE; means and needs of local authorities in energy efficiency, with special regard to nZEB buildings and renovation policies. Placed in a CEE regional context, our conference would share important supporting possibilities for public nZEB refurbishments.

Speakers will start with a short presentation of ca. 12-15 minutes, focusing on their role and leadership actions in energy efficiency (suggested focus on buildings' energy efficiency) and on the support which they can share with others in favour of EE/nZEB investments. This will be followed by a moderated panel discussion with experts on the outcomes of the **Buildings for the Visegrad Future Workshop** at C4E Forum¹, Serock 2018.

After the panel discussion, a Q&A session will follow with the audience.

Organiser of the event: MEHI Hungarian Energy Efficiency Institute, Energy Cities and Energiaklub

Moderated by Gabriella Szalai, MEHI and Orsolya Fülöp, Energiaklub

Language of the session: Hungarian and English (with interpretation)

Admission is free of charge.

Agenda – planned

<i>Time</i>	<i>Duration</i>		
9:30-10:00	30 min	Registration	
		Support for EE investments of local authorities	
10:00-11:00	15 min	<i>Opening Introduction to support provided by international networks</i>	<i>Krisztina Dely Energy Cities</i>
	15 min	Introduction of the Hungarian Network of Energy Advisors	<i>Éva Csákány representative of the network</i>
	15 min	SECAP and possibilities to join INTERREG eCentral project for a local authority in implementing EE and climate measures	<i>Zsófia Pej Energiaklub</i>
	15 min	Q&A Session	
		Best practices from municipalities	
11:00-11:40	10 min	INTERREG Together – measured smart data contra users' awareness	<i>Tamas Csoknyai BME</i>
	10 min	SASmob – Sustainable mobility in Szeged City ²	<i>Péter Pázmány Municipality of Szeged</i>
	10 min	Cooperation of Velenje Municipality and Local Energy Agency in energy efficiency refurbishments	<i>Nejc Jurko, KSSENA, Regional Energy Agency</i>
	10 min	Q&A Session	
11:40-12:00		Coffee break	
12:00-13:00		Panel discussion on the outcomes of C4E conference Public building renovation with limited fund	
	30 min	Moderated discussion led by <i>Gabriella Szalai, MEHI (Hungarian Energy Efficiency Institute)</i> Invited experts: <i>Kristóf Lengyel, Director for Energy Services, Pannon Építőműhely Ltd.</i> <i>Gábor Kuntner, CEO, Energy Hungary</i> <i>András Ósz, Managing Director, LG Energia Ltd.</i>	
	20 min	Q&A	
	10 min	Closing	
13:00		Networking lunch
